(54) Title: METHOD OF AUTHORIZATION

WO 2005/080720 A1

(57) Abstract: A method for granting access to arrangements (2; 11) such as computers, doors, vehicles or other arrangements to which access is required for a user, comprising the transmission of a code over a short-range radio link (5; 13). The invention is characterized in that an access code (an ID-code) is transmitted from a central computer (1) via radio waves to a radio terminal (3) that the user possesses, in that the radio terminal (3) is caused to transmit the said ID-code over the said short-range radio link (5; 13) to the said arrangement (2; 11), in that the said arrangement (2; 11) or a transmitter unit in the said arrangement is caused to transmit the said ID-code to the said central computer (1), and in that the said computer (1) is caused to compare the received code with the code that the computer (1) transmitted to the radio terminal (3).
